DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6 April 2007 has been entered. Claims 1-5 and 7-18 are pending, of which 3-5, 7 and 12 are withdrawn.

Election/Restrictions

2. Claim 1 is allowable. The restriction requirement between species, as set forth in the Office action mailed on 8 February 2005, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 3-5, 7 and 12, directed to species II are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim. In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

3. Claims 1-5 and 7-18 are allowed.

4. The following is an examiner's statement of reasons for allowance:

Claims 1-5, 7, and 10-17 are allowable over the prior art for at least the reason that the prior art fails to teach and/or suggest a scanning microscope with two light beams and beam deflection device and "a mirror which can be **selectively** introduced in guided fashion into the illumination beam and detection beam paths at a position in the illumination and detection beam paths" as set forth in the claimed combination.

Hoffman discloses a confocal scanning microscope comprising: an illuminating light source (17), a beam deflection device (31); a detector (45); a manipulating light source (21) and a mirror (27; incorrectly labeled 31 in fig. 2) which can be introduced in guided fashion into the illumination beam and detection beam paths at a position in the illumination and detection beam paths (fig. 2, at least in so far as it was guided into place during assembly), the detection beam path having a direction opposite to a direction of the illumination beam path at the position (fig. 2), whereby the mirror directs the manipulating light beam via the beam deflection device onto the sample (fig. 2); and wherein the manipulating light beam (from 21) can be guided over the

Art Unit: 2872

sample (39) using the beam deflection device (31) but does not have a mirror that is selectively introduced as claimed.

Claims 8-9 and 18 are allowable over the prior art for at least the reasons set forth in the office action mailed 6 February 2007.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
